Subject: DeBary Minor Stormwater Projects
Attachments: 3- List of SW Minor Projects - updated September 2017.pdf

Good Afternoon Ron,

Please find attached the most recent Minor Stormwater Projects spreadsheet that was presented during the 2017 Stormwater Update presentation to the City Council on 11/01/17.

Based on the attached spreadsheet, the following is the status of the Minor Stormwater Projects:

- 56 total minor stormwater projects identified since 2004;
- 12 total projects constructed thus far;
- 8 total projects earmarked for the next round of design and improvements during 2018; and
- 36 total projects remaining.

Of the 36 remaining projects, they can be further broken down into the following categories:

- Groundwater Seepage / Underdrain Project = 6
- Storm Pipe Repairs / Maintenance = 6
- Localized Flooding (Install Inlets and Pipes) = 16
- Regrade Ditch / Install Culvert(s) = 3
- Miscellaneous Projects that warrant further evaluation = 5

Lastly, in regards to a “ball park guess estimate” to address the remaining 36 projects, I would say \$4,000,000.

Respectfully,

David W. Hamstra, P.E., CFM
