

Construction for stormwater improvements on S. Shell Rd. begin Oct. 12, 2015

Construction crews will begin stormwater improvements on S. Shell Road, between Park Lane and Catalina Drive. Vehicle traffic on S. Shell Road will be diverted to Highway 17/92 with signage placed to direct traffic around the work area and returned to Shell Road for continuation. The detour can be expected from 7 AM to 7 PM, Monday thru Friday for approximately one month. Construction will be limited to a "one block" work area and the detours will be similar, one or two blocks in length, as the construction operation progresses from north to south on Shell Road, beginning at Park Lane. Residents, emergency vehicles, waste collection and delivery services will be provided access to residences within the work areas at all times.

The proposed construction is part of the DeBary, Small Scale Stormwater Improvement Project No. 2. The General Contractor is OVATION CONSTRUCTION, INC. and the Subcontractor that will be conducting the work on Shell Road is, ALL TERRAIN TRACTOR SERVICE, INC.
