

The City of DeBary debris pick-up operations is scheduled to end on Wednesday November 2nd. During this period the city's debris contractor, DRC, will continue to remove large storm related piles of vegetative debris. Residents that have small piles of debris may place them in bags or containers for disposal by Waste-Pro. Only large storm debris piles will be picked up by the city storm debris removal contractor.

****New tree removal and fresh vegetation is not storm debris, and individual property owners are responsible for debris removal from their private property. ****
