Winter Park, FL 32789

Re: Utility Service to Riviera Bella Subdivision, Units 8 and 9, DeBary

Dear Mr. Beverly,

This letter is provided in response to your e-mail request dated December 15, 2015, for confirmation that utility service is available to the referenced property.

Please be advised the referenced development is located within Volusia County's water and wastewater service area. The county has adequate water and wastewater capacity to serve the development. Capacity may be reserved in the county's water and wastewater system upon payment of impact fees. The county's impact fee schedule and impact fee calculation sheet are available at [volusia.org/services/public-works/water-resources-and-utilities/](http://volusia.org/services/public-works/water-resources-and-utilities/). Prior to final construction plan approval, the engineer will need to demonstrate the adequacy of the water and wastewater mains along Fort Florida Road to support the proposed development.

Please call me at 386-943-7027, ext. 12076, if you have any questions.

Sincerely,

A handwritten signature in blue ink that reads "Scott Mays".

Scott Mays, P.E.  
Utility Engineer

C: Mike Ulrich, Director, Water Resources and Utilities
