

# Water Balloon Olympics

Event #1 is Water Balloon Toss Across. Two people stand one foot away from each other and toss the water balloon. After each person catches the balloon, that person takes a step back and throws it to the other person. This back and forth continues until the balloon pops. Whoever stays dry is the winner.

Event #2 is Spoon Races. You will need to make smaller water balloons for this so they are easier to manage. Set a start line. Each person has a plastic spoon and water balloon. First one to cross the finish line without popping the balloon is the winner!

Event #3 is Ring Toss. This is where the hula hoops come in. We placed the two hula hoops in the grass. The larger one was about 8 feet away. The smaller one was about 12 feet away. Each person gets 5 balloons to toss. The larger hoop is worth 25 points and the smaller hoop is worth 50 points. Person with the most points wins!
